

# Viet Nam IFR X

Beta Edition

Available on:

# *Let the tale begin, but with Scenery*

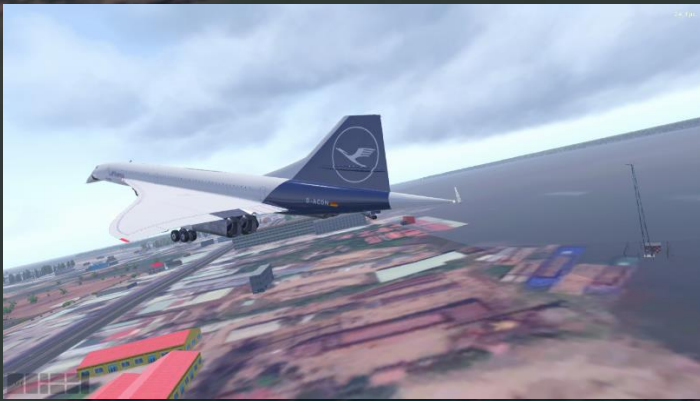

You were flown to USA, Canada, Europe, but you never flown to Vietnam in X-plane, don't you?

Don't worry, TheFlightSimulations will bring Vietnam to you, with tons of features, and IT'S FREE!

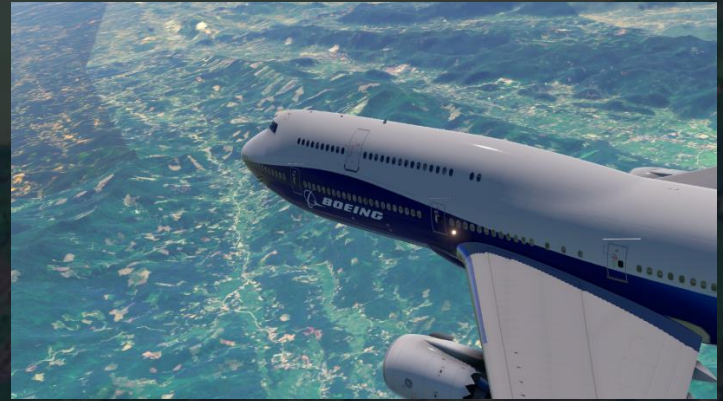

## *Main features:*

- 7 airports include with HD quality, ground services, ATC, SAM Jetways (if the airport you chose available).
- Over 331.000 km<sup>2</sup> of area covered with overlay (including: buildings, roads, forest, etc.).
- Compression size make sure you've downloaded at lowest size, but still able to open it without trouble.
- Orthophotos with high ZL at airport or at the city, but low enough at forest or undefined area to get the best experience without running at lower FPS.

## *Screenshots:*

Concorde is landing to Can Tho Intl. Airport

Boeing B747-8 is flying over Ha Noi

Boeing 737-800NG is parking at Ca Mau

Cessna C172 is flying over Ho Chi Minh City

## *Special thanks to:*

MisterX

Developers who developed R2 Library

Antwob (Developer of worldmodels)

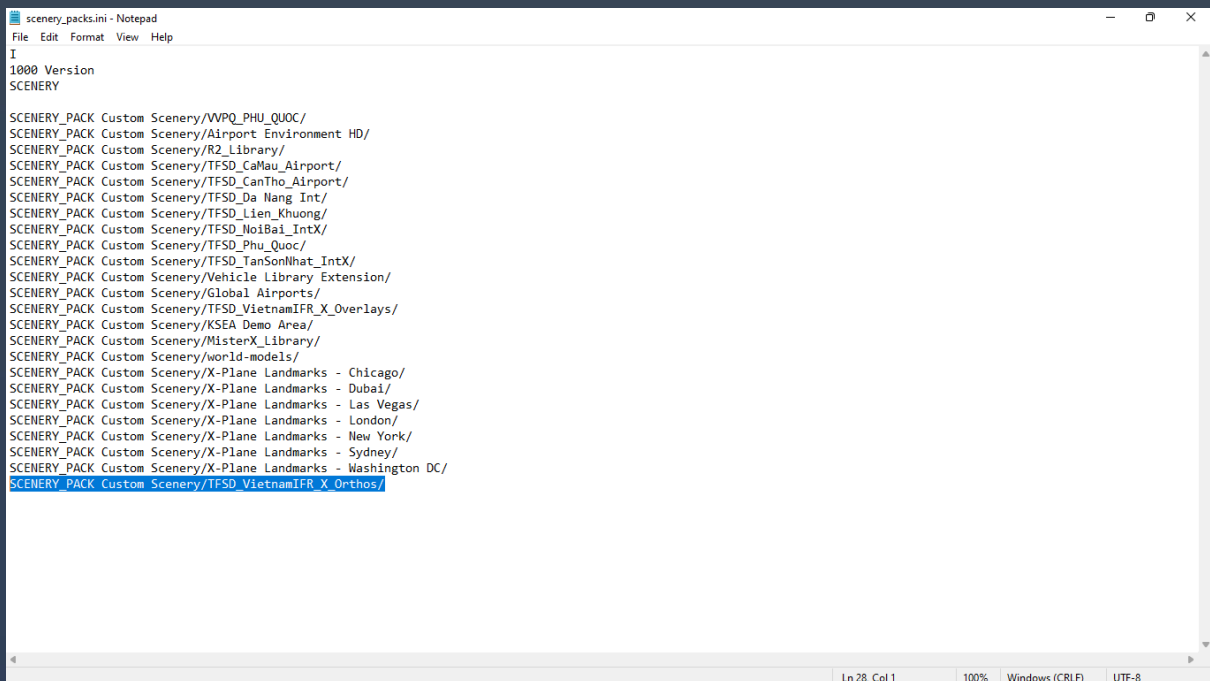

Oscar Pilote (Developers of Ortho4XP)

# System requirements:

Minimum X-plane version: 11.00

## Installation:

1. Extract all files into your main X-plane's installation. All files will be automatically placed
2. (Optional) If you want to use Orthophoto instead of create them, then we've few note:
  - + If your orthophoto compression file doesn't contain sub folder (Named TFSD\_VietnamIFR\_X\_Orthos), then you'd need to create this in "Custom Scenery" folder. This folder is also in your main X-plane's installation. After that, you can extract it into your folder you just created.
  - + If your orthophoto contains, go ahead and extract it into "Custom Scenery" folder.
  - + After extract, make sure your orthophoto's folder was written in the bottom of the "scenery\_packs.ini" (This file exists in "Custom Scenery" folder). You can see this image if you don't understand.

```
scenery_packs.ini - Notepad
