Flight Simulator X: Remake
Global Edition

TheFlightSimulations

Our partner:

L
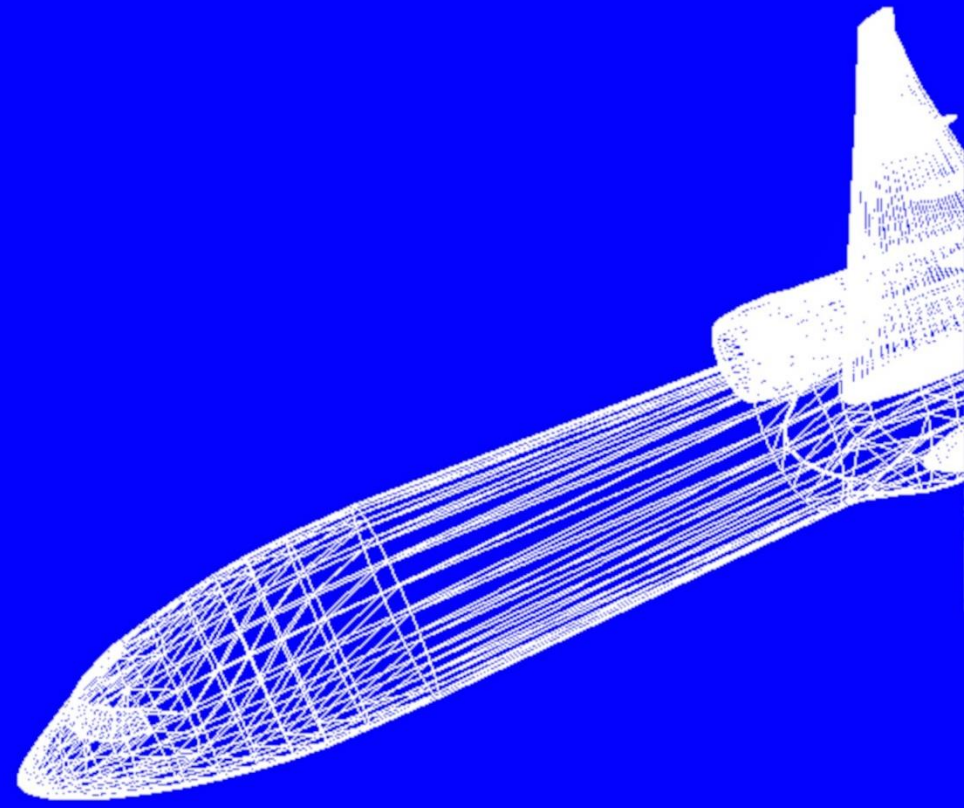

System requirements:

	Minimum	Recommended
OS:	Windows 8.1 32-bit	Windows 11
RAM:	6GB DDR3	8GB DDR4
CPU:	Intel Core i3 7th Gen	Intel Core i5 7th Gen
GPU:	NVIDIA GeForce 840M	NVIDIA GeForce 920MX
ROM:	165GB at C:	175GB at C:

What's new? See here

Installation:

1. Save all parts in a same folder and extract them. You'll get a ".iso" file. Open it as Windows Explorer or any 3rd-party software can mount it, not extract it. DO NOT TRY TO EXTRACT IT.
2. Explore the mounted iso and run a file "Installer (Run as admin).bat". Right click and select "Run as Administrator".
3. Follow the intructions in the installation.
4. **(Only for Windows 8.1 and early versions of Windows 10)** When the installer tries to import the registry, Windows Explorer will pop up. Go to "the partition you just mounted up>Remake Settings>6. Registries" and import "Microsoft FSX Remake.reg".

Note: If you've any problem with the installer, stop the installation immediately and contact us.

Links (You'd need to download all parts):

Modsfire	Google Drive	Mega
Part 1	Part 3 – 7	Part 17 – 19
Part 2	Part 8 – 11	Part 20 – 24
	Part 12 – 16	Part 25 – 27

Installation SDK:

If you want to see how to install it manually, or edit settings and registries before importing them, you will find an SDK that belongs to this document.

….and much, much more

A few notes:

- If you have problem with GSX or additional add-ons and you were installed FSX Remake in auto-installer, you just import the file in the Registries folder – which belongs with the document, not mount .iso file.
- If you were installed FSX Remake in custom mode and you have some problems with FSX, see SDK folder.
- Any update or news about this products, see here.
